Materialo®

Declaration for texture partnership of Materialo®

The partner confirms that he can provide all relevant graphic data and description of articles. This data should fulfil the minimum demand in quality to generate a good result in **Materialo®**.

The graphic data features fabric repeats or complete tiles or another useable format to be used in visualization of active online. The graphic repeats will be set together to a perspective area in a room scene or in a swatch image. Product information (i.e. number of article, text, etc.) and emotion images can be delivered by the partner. The partner further declares to have the ownership of all delivered data. The ownership will be transferred to active online for the use in **Materialo®** only.

We point out that we like to publish the whole range of articles if this is possible for the partner. To deliver the whole range is ambitious but not obligatory.
