# Materialo®

## Texturpartnerschaft Materialo®

We confirm that we provide all available graphic decor and material data in suitable quality for visualization on the **Materialo®** platform.

Depending on the product group, the graphic decor data shows complete repeats or complete planks or other installable units, which are combined in the visualization of **VEEUZE** to form a perspective surface in a room image. Supplementary product information (article numbers, texts, ...) as well as optional detail/emotion images will also be made available in a suitable form.

We are the owner of the image rights.

As a texture partner, we have been informed that it is essential for our trading partners that all products are depicted as completely as possible. The complete provision of textures and data should therefore always be aimed for, although there is no obligation to digitize all products.

The texture partner hereby declares its consent to the use of the texture data provided and already created.
